

# Room 9's Digital Technologies

In Room 9 we have been using a lot of Digital Technologies in our learning. One of the new programs we are using is called SWAY.

Sway is used for presenting quite a few different writing styles.

We used Sway to present our Travel Guides.

One of the great parts of Sway is that you can use a QR code to scan and bring up your Sway presentation on your phone.

If you don't have a QR code scanner you can go to the app store on your phone and download it for free.

Once you have the QR code scanner - try scanning some of our QR Codes to see our presentations. Your child will need to log into their student account to see the presentations.

*Joel*

I really enjoyed using sway because I felt it was a lot more productive while making a brochure than just writing it out on word.

*Zaali*

I really liked how easy it is to use, you can learn really quickly and it is such a fun activity.

*Luis*

I really loved using sway for our brochure because it was interesting to explore sway.

*Rain*

I really like sway because it makes writing a brochure a lot easier and even tells you what to write.

*Leah*

I really enjoyed using sway to do my travel guide because it was easy than writing and colouring the pictures.

*Stanley*

I really liked sway because you can get your work easily and transfer to other people.

*Jason*

I really liked using sway for my travel guide because it was easy to do your work on and looks cool when you present it.
